June 17th 1980

Mrs Ida Mae Northworthy
Portland, Ark.

Dear Ida Mae:

The reason for the delay in answering your request via telephone is that we left P.B. the morning after you called and have just returned.

I thought I had some old notes out of the Hamburg papers about the home place, but can't find them. The only thing I remember is that early ^{eighteen hundred} ~~eighteen~~ ^{hundred} (about 1832 I think) some one (probably a Mr. Canaack) built a small saw-mill on the East valley of the Bayou and ^{SAWED} ~~SAWED~~ lumber for the house. The story goes that if a piece of lumber had only one "boat-live" in it he ~~threw~~ ^{was} the Bayou, using only perfect boards and I believe that. Also that he cut some trees, sent them to Rattle Rock to some one who ^{had} ~~had~~ ^{full drawn} ~~full drawn~~ ^{boards} ~~boards~~ ^{boards} pieces for the foundation. This was sent by ^{mail} ~~mail~~ ^{mail} and floated ^{back} ~~back~~ ^{back} by Bayou. The house has no ^{needs} ~~needs~~ ^{needs} as it was put together with ^{logs} ~~logs~~ ^{logs}. The original lumber is in the house - but I'm sure it has been re-roofed.

I had a very interesting article about when during the Civil War, the Carpet-baggers took over and literally cleaned out everything. I'm not sure when my grandfather (Mr. Moats) bought the place but probably was born. Sorry I can't be of more help. They have been bothering me for some time out of Little Rock about (over)

this restoration - but since I don't own the place
I turned them down.

I'm like your husband - I've been retired and
only keep my hand in the cotton business to keep
from growing old. But I do miss the excitement I
had with the wonderful people of Portland.

We just do a lot of traveling.

I hope this is some help - Give our regards to
all of your family, and next time we D.B. come
to see us.

Sincerely,
Julia Bailey
